उपलब्ध सुविधा

श्रवण विभाग (AUDIOLOGY)
- **ऑडिओमेट्री** (Audiometry)
- **टायाम्पॅनोमेट्री** (Tympanometry)
- **OAE** (Otoacoustic Emissions)
- **BERA** (Brainstem Audiometry)
- **Hearing Aid Selection** & Fitting
- **Cochlear Implant** Mapping
- **Auditory Verbal Therapy**
- **Ear Mould** & Protection

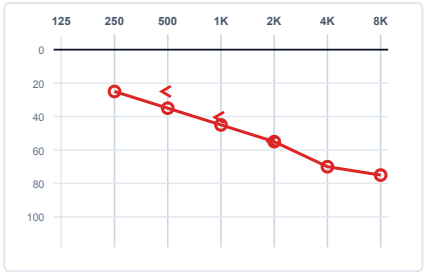

वाचा विभाग (SPEECH/LANG)
- **वाचा विलंब** (Speech Delay)
- **तोतरेपणा** (Stuttering)
- **ऑटिझम & ADHD** Therapy
- **न्यूरोजेनिक अडचणी** (Stroke)
- **आवाज विकार** (Voice)
- **गिळण्याच्या अडचणी** (Dysphagia)

संतुलन विभाग (VESTIBULAR)
- **चक्कर & संतुलन** (Vertigo)
- **व्हस्टिब्युलर थेरपी** (VRT)
- **पडणे प्रतिबंधक व्यायाम**

PURE TONE AUDIOMETRY (AIR & BONE CONDUCTION)

RIGHT EAR AUDIOGRAM (RED)

Right PTA1: 48.3 dB HL (Moderate SNHL)

LEFT EAR AUDIOGRAM (BLUE)

Left PTA1: 18.3 dB HL (Normal Hearing)

AUDIOMETRIC PARAMETERS & TUNING FORK TESTS

EAR	PTA1 (D…	PTA2 (D…	SDT (D…	SRT (D…	WRS % AT DBHL	MCL (D…	UCL (D…	RINNE
Right Ear	48.3	52.5	45	50	76% at 80 dB	75	95	+ve (Po…
Left Ear	18.3	20.0	15	20	96% at 50 dB	50	100	+ve (Po…
Weber Tuning Fork Test (512 Hz)							Lateralizes to Left …	

TYMPANOGRAMS & MIDDLE EAR IMMITTANCE

PARAMETER	LEFT EAR	RIGHT EAR	CLINICAL NORM
Tympanogram Type	Type A	Type A	Normal Peak
Peak Pressure (daPa)	-11 daPa	-24 daPa	-100 to +50 daPa
Static Compliance (ml)	0.87 ml	0.69 ml	0.3 to 1.6 ml
Ear Canal Volume (ml)	1.1 ml	1.7 ml	0.6 to 2.0 ml

OAE SCREENING (TEOAE / DPOAE)	TINNITUS EVALUATION (THI / TRT)
• Right Ear: **REFER (High Freq Deficit)** • Left Ear: **PASS (Robust Outer Hair Cell)**	• THI Score: **46 / 100 (Grade III Moderate)** • TFI: **52.4 / 100** | TRT Category: **Category 2**

DIAGNOSTIC RESULTS & CLINICAL IMPRESSION

• Patient presents with a **unilateral moderate sensorineural hearing loss in the Right Ear** (PTA1: 48.3 dB HL, sloping high-frequency configuration) and **normal hearing sensitivity in the Left Ear** (PTA1: 18.3 dB HL).

• Immittance testing revealed **Type A tympanograms in both ears**, consistent with normal middle ear pressure, normal tympanic membrane mobility, and intact eustachian tube function.

• Word Recognition Score (WRS) is **76% in the Right Ear** at 80 dB HL presentation level and **96% in the Left Ear** at 50 dB HL. DPOAE confirmed high-frequency outer hair cell dysfunction in the Right Ear.

CLINICAL RECOMMENDATIONS

- **Hearing Aid Trial**: Pursue a trial with digital amplification (Receiver-in-Canal RIC Hearing Aid with Tinnitus Sound Generator TSG) for the Right Ear for improved hearing clarity and speech understanding.
- **Communication Strategies**: Face the speaker, engage in face-to-face communication, reduce background noise.
- **Tinnitus Retraining Therapy (TRT)**: Initiate sound therapy counseling and habituation protocols for Right Ear tinnitus.
- **Follow-up**: Schedule an annual audiological re-evaluation in 12 months.
