BASLP, Rehabilitation Council of India (RCI) Reg.
Consultant Audiologist & Speech-Language Pathologist

SPEECH & LANGUAGE COMPREHENSIVE ASSESSMENT REPORT

Patient Name:	Master Aarav S. Patil	**UHID:**	PGC-26-000215
Age / Gender:	4 Yrs 6 Mos / Male	**Date of Test:**	October 09, 2026
Informant:	Mrs. Sangeeta Patil (Mother)	**Primary Language:**	Marathi (Home) / English (Preschool)

1. ALD-MM & LPT LANGUAGE BATTERY SCORES

TEST BATTERY	DOMAIN / SUBTEST	EQUIVALENT AGE / RAW SCORE	DEVELOPMENT QUOTIENT (DQ) / SEVERITY
ALD-MM (Assessment of Language Development)	Receptive Language Age (RLA)	3 Years 0 Months	**Receptive DQ: 66.7%** (Moderate Delay)
	Expressive Language Age (ELA)	2 Years 6 Months	**Expressive DQ: 55.5%** (Significant Delay)
	Overall Language Age	2 Years 9 Months	Chronological Age: 4 Yrs 6 Mos (19 Mo Gap)
LPT (Linguistic Profile Test)	Phonology & Articulation	75% Mastery	Mild substitution errors (Dentalization)
	Semantics & Vocabulary	60% Mastery	Limited expressive vocabulary (< 150 words)
	Syntactic Structures	45% Mastery	2-3 word utterances (Subject + Verb)
	Pragmatics & Social Use	65% Mastery	Maintains eye contact; intent expression impaired

2. CAPC-M PRAGMATIC ANALYSIS & DALI SCREENING

ASSESSMENT BATTERY	OBSERVED BEHAVIORAL PARAMETER	CLINICAL RATING / SCORE	CLINICAL RECOMMENDATION
CAPC-M (Pragmatics & Communication)	Non-Verbal Communication	Adequate (Gestures, pointing)	Leverage visual aids during therapy
	Turn-Taking & Topic Maintenance	Deficit (Needs clinician prompt)	Structured social turn-taking activities
	Conversational Repair & Intent	Impaired (Becomes frustrated)	Introduce repair strategies and cue cards
DALI Screening (Pre-Literacy Screening)	Phonological Awareness	Below Age Expectations	Rhyming and syllable segmentation training
	Rapid Automized Naming (RAN)	Delayed (> 3.5 sec per item)	Visual-auditory association drills

3. PCC PHONOLOGICAL ANALYSIS & AAC / AVT TRACKING

CLINICAL DOMAIN	EVALUATION PARAMETER	OBSERVED DATA / FORMULA	SEVERITY / CLINICAL STATUS
PCC Analysis	Percentage of Consonants Correct	Formula: (78 Correct / 120 Total) * 100	**PCC = 65.0% (Moderate Phonological Disorder)**
AAC Evaluation	Augmentative Communication Readiness	Direct touch access, PECS Phase II candidate	Recommended Low-Tech Communication Board (2x2 Grid)
AVT Tracking (Auditory Verbal Therapy)	Erber's Auditory Hierarchy	Detection: 100%, Discrimination: 80%, ID: 60%	Targeting Auditory Comprehension of multi-step commands
	Ling 6-Sound Test (/m,ah,oo,ee,sh,s/)	Consistent detection at 3 meters	Good auditory awareness across speech spectrum

DIAGNOSTIC IMPRESSION & TREATMENT PLAN:
1. **DIAGNOSIS**: Moderate Receptive-Expressive Language Delay secondary to Developmental Language Disorder (DLD), with co-occurring Phonological Disorder (PCC 65%).
2. **SHORT-TERM GOALS (3 MONTHS)**: Expand expressive vocabulary to 300 words; increase MLU to 3-4 word combinations; improve retroflex consonant production.
3. **PLAN**: Individual Speech-Language Therapy 3 sessions/week (45 mins each) focusing on auditory verbal expansion, vocabulary enrichment, and parent child-guided home stimulation.

Date: October 09, 2026
Place: Satara
